

Mission Statement

To help our clients creatively resolve problems which have defied solution through typical problem solving approaches. We are focused on assisting our customers to make/save money, while resolving complex issues, and leverage their creative, problem-solving capabilities.

Company

Value Innovation, LLC provides first-class guidance to various organizations and companies. Our methodology integrates the techniques of Value Engineering and Structured Innovation/Creativity-on-Demand (based on the TRIZ methodology). Combining these complementary, function-based tools, results in valuable solutions for our clients.

With a focus on cost savings, greater idea generation, and maximizing value, we recognize and resolve the inherent contradictions of identifying, leveraging and overcoming resistance to implementing high impact solutions. We offer a combination of analysis, training, mentoring and consulting. We provide leadership training and tools to promote a culture of Value and Innovation.
